5 missing after U.S. Navy helicopter crashes in the Red Sea

-, 22.09.2013, 19:45 Time

USPA News - A U.S. Navy helicopter carrying five crew members crashed in the Red Sea on Sunday while conducting routine flight operations, officials said, but it was not immediately known if there were any survivors. No hostile activity was reported in the area.

The accident happened at around noon local time when an Sikorsky MH-60S Knighthawk helicopter was carrying out routine flight operations near the guided-missile destroyer USS William P. Lawrence. The vessel is part of the USS Nimitz Carrier Strike Group which was deployed to the Red Sea earlier this month when the U.S. considered taking military action against Syria. U.S. Naval Forces Central Command said the crash happened in the central Red Sea, but provided no specific location. It said the fate of the five personnel on board the helicopter was still being determined with the USS Nimitz Carrier Strike Group providing aircraft and small boats for search and rescue. It was not immediately known what caused Sunday's accident, but navy officials said it was not the result of any sort of hostile activity. "The incident is under investigation," a brief statement said.
